Denpasar, Bali, Indonesia

Bachelor of Information Technology from the Faculty of Engineering at Udayana University, specializing in Data Processing and Text Mining. A Machine Learning enthusiast with hands-on experience building NLP clustering models. Skilled in blending data analytics with graphic design to deliver visually engaging data storytelling and actionable insights.

EDUCATION

Udayana University

S1 - Information Technology, Data Science Concentration (GPA 3.67)

Relevant Coursework: Statistics, Data Analytics and Visualization, Data Science Programming, Data Mining, Machine Learning, Deep Learning, Computer Vision and Web Application Development.

08/2021 – 04/2026

Jimbaran, Bali

RevoU

MSIB Batch 5 - Data & Software Engineering (Grade 92/100)

Studied foundations of data analysis and software engineering, focusing on Microsoft Excel, SQL implementations, Google Looker Studio, while also gaining web development fundamentals.

08/2023 – 12/2023

CERTIFICATION

Microsoft ElevAlte – Digital Talent Scholarship

Completed full learning path: Micro Skill, AI Beginner, Intermediate, Advanced, and AI Hackathon.

• Focus: Artificial Intelligence, Microsoft Azure, Computer Vision, NLP, Project Management, Front-End Development.

PROJECT EXPERIENCE

Indonesian News Topic Modeling

2025 – 2026

Thesis Project

- Engineered an end-to-end NLP pipeline to process 100,000+ scraped news headlines, implementing custom domain-based stopwords to effectively filter out journalistic noise.
- Developed an Agglomerative Hierarchical Clustering (AHC) model to map text taxonomies, evaluating various linkage methods to present the optimal topic structures through clear data visualization.

HaloHati - Microsoft ElevAlte Hackathon

05/2025 – 06/2025

Hackathon Project

- Designed and implemented the front-end interface ensuring responsive and user-friendly experience
- Contributed to overall web design and system integration within a collaborative hackathon environment.

Data & Software Engineering

08/2023 – 12/2023

RevoU Capstones

- Data Analysis:** Focused on data cleaning and preprocessing. Assisted the team lead in coordinating analysis tasks and maintaining workflow efficiency.
- Software Engineering:** Served as the Team Leader, managing project timelines and guiding development of a functional web application. Applied both front-end and back-end principles to deliver a cohesive product.

SKILLS

Data Science: Python | Jupyter Notebook | Streamlit | Django Framework | Microsoft Excel | GitHub

Cloud Provider: Google Cloud • **Design:** Figma | Canva | Adobe Lightroom
